HORIZON ENERGY MONITOR

This ideal accessory to FCJJ-30 feeds live experiment data to your PC to be displayed as graphical data.

Product Description

The Electric Mobility Science Kit lets students experiment with tomorrow's sustainable transport solutions. Measure the superior energy density and power of the super capacitor. Compare different kinds of fuel cell technology, all of which convert elements into electrical energy: the direct ethanol fuel cell, the salt water fuel cell and two types of micro-PEM fuel cells that exploit the energy efficiency of hydrogen fuel stored in the HYDROSTIK PRO metal hydride cartridge. Plus, you can demonstrate the power of sunlight with the solar panel and generate electricity with the hand crank.
